

FOR IMMEDIATE RELEASE

## **New Onkyo Flagship AVR Raises the Standard in Home Entertainment Experiences**

**Indianapolis, Ind. (March 28, 2023)** — Onkyo® announces the TX-RZ70 flagship 11.2, 140-watt-per-channel, audio video receiver (AVR) to its global line of home entertainment solutions, providing stellar audio performance and studio-level processing for music, home theatre, and gaming fanatics alike. Onkyo packs the TX-RZ70 with the most advanced immersive audio technologies, breaking new ground to deliver the ultimate home entertainment experiences.

HDMI 2.1, 8K/4K resolution, and 40Gbps speeds come standard with the TX-RZ70, with full bandwidth functionality for the fastest refresh to keep up with the newest gaming consoles. Premium 32-bit ESS Sabre DACs provide unprecedented dynamic and ultra-low distortion, while the included Dirac Live® Room Correction Full Bandwidth system develops the best sound for your room's layout. Optional user upgrades are available for Dirac Live Bass Control, which uses machine learning and AI to quickly determine ideal settings for any layout.

The Onkyo TX-RZ70 AVR includes advanced music streaming and connectivity and works with smart home assistants like Alexa, Hey Google, and Siri. Roon Ready certification puts users' entire high-resolution music libraries at their fingertips (available with a firmware update in September 2023). The whole home entertainment experience can be aligned with this state-of-the-art technology and fuelled by studio-grade processing, Bluetooth transmitter with aptX for sharing audio to Bluetooth headphones, and more. This new model joins the award-winning Onkyo AVRs, featuring THX Certification, Klipsch Optimized Mode for peak performance with compatible hi-fi speakers, and IMAX® Enhanced for clearer, brighter video and immersive audio.

Premium Audio Company (PAC) purchased the Onkyo brand in 2021. It has been important for the company to retain and embrace the engineers' expertise and decades of institutional knowledge at its Technology Center in Osaka. "The flagship Onkyo TX-RZ70 AVR is one of the first projects our PAC product development team has worked on with the existing Onkyo engineering team and represents a new standard of performance in its class," explained Rob Standley, SVP of Global Brands – Elite, Pioneer, Integra and Onkyo.

The Onkyo TX-RZ70 AVR (SRP £3,099 / €3299) will be available in Spring 2023 through authorised retailers. Henley Audio distributes Onkyo AVRs in the UK. For more information, visit [eu.onkyo.com](https://eu.onkyo.com) and [www.henleyaudio.co.uk](https://www.henleyaudio.co.uk).

###

**About Onkyo**

Onkyo's philosophy for delivering wholly immersive entertainment focuses on how sound feels in real life. Our approach to amplification naturally expresses the energy in music, confidently driving any speaker system with full-bandwidth signals. Whether enjoying vinyl or an object-mixed film soundtrack, be transported into the world created by musicians and directors. Expect transcendence without compromise from products built by professionals who live for great sound.

**About Premium Audio Company**
