

## Product Announcement

### Pro-Ject Speed Box DS Strobe Available Now

**The ultimate affordable upgrade.**

*Didcot, Oxfordshire – 17<sup>th</sup> February, 2015*

Since its launch in 2012, the Debut Carbon turntable from Pro-Ject Audio Systems has taken the analogue hi-fi market by storm. Combining a striking design with phenomenal sound, it's proven a worthy successor to the 'Debut' name. Now, Pro-Ject are showing continued support to those customers who have purchased the original Debut Carbon – as well as many other older 230V and 16V AC motor models – by introducing the Speed Box DS Strobe.

By connecting a compliant turntable to this neat little box you can achieve new levels of motor efficiency, while also bringing automatic speed change to your system; effectively improving the sound quality and the convenience of your record player in one step.

The Speed Box DS Strobe allows for easy switching between 33  $\frac{1}{3}$  and 45 RPM speeds, without having to touch the drive belt. With the additional Speed Box Pulley (available separately for £15.00) you can also achieve 78 RPM speed on compliant turntables. The '+' and '-' buttons on the front panel allow for finer speed adjustments, to perfectly suit the preferred listening speed of the playing record. By pressing these buttons you can adjust the speed by 0.2% up or down in 40 steps, for ultimate flexibility. A master speed reset function allows for easy switching back to the base-level speed.

The inclusion of a stroboscopic light attachment means that you can also partner your turntable and Speed Box DS Strobe with Pro-Ject's Strobe-IT (available separately for £25.00), to confirm when you're spinning at the exact speed you need.

As well as convenience, the Speed Box DS Strobe can also improve the sound quality of your turntable. The speed regulation is quartz-generated, so the normal noisy mains signal from your home plug socket is replaced with clean 230V power that's been kept free of interference. This process allows the motor to run silently and efficiently, reducing the natural resonances that can transfer through to the plinth and degrade the sound performance.

As well as the Debut Carbon, the Speed Box DS Strobe is a great upgrade for all Pro-Ject turntables with 230V AC motors and a captive mains lead. Most turntables with 16V AC motors can also use this upgrade.

**SRP £199.00**

**The Speed Box DS Strobe is available now in Black finish only.**

## Technical Information

Speeds:	33, 45 & 78RPM
Speed Stability:	± 0.001%
Pitch Control:	± 40 steps of 0.2%
Output:	230V / 3W max.
Power Supply:	18V / 1A DC
Power Consumption:	3W Max.
Dimensions (W x H x D):	103 x 72 x 150mm (incl. sockets)
Weight:	1.34kg (excl. power supply)
