

Product Announcement

Roksan Re-Align K2 Series Amplifiers

Multi-award winning range gets a new competitive edge.

Didcot, Oxfordshire – 31st March, 2015

The Kandy K2 range of hi-fi separates from Roksan Audio have been a huge international success since their introduction in 2008; and the later development of the K2 BT Integrated Amplifier in 2013 further attested to the exceptional performance Roksan could offer from a range of sub-£1,000 components. Now, with the birth of the K3 Series, Roksan are re-aligning the K2 range to appeal to a wider pool of hi-fi enthusiasts than ever before.

From April 2015, the K2 Integrated Amplifier and K2 BT will have their suggested retail prices cut, offering new customers exceptional value-for-money on one of the most successful amplifiers of recent years. The K2 Stereo Power Amplifier will follow suit, having its price reduced to match the integrated options.

K2 BT	Was: £945.00	Now: £800.00
K2 Integrated Amplifier	Was: £875.00	Now: £700.00
K2 Stereo Power Amplifier	Was: £775.00	Now: £650.00

The previously-announced K2 Twin Packs will continue to run while stocks last, offering even better value for-money when two items are purchased at the same time. The K2 (TR-5) speakers will also continue to run, offering customers a beautiful speaker that perfectly complements the sound signature of the K2 electronics.

The K2 range from Roksan Audio has been built to achieve that signature Roksan sound at an affordable price. The K2 Integrated is a truly musical amplifier that sounds more accurate, more delicate and even more powerful than those that came before it. The K2 Power Amplifier boosts the sound-stage further, either in pre-power or bi-amp configuration when partnered with the K2 Integrated. The K2 Speakers utilise premium components and a stunning ribbon tweeter to perfectly deliver the sound performance of the electronics.

The K2 BT (pictured) bridges the gap between K2 and K3 by building upon the K2 Integrated Amplifier design with an increased power output, improved internal components and the inclusion of aptX® Bluetooth technology so you can wirelessly stream your digital music from an enabled device in up to CD-quality audio.

The new K2 prices are available from April 1st.
