Product Announcement: Pro-Ject Stereo Box S

Henley Designs are delighted to announce the latest addition to the Box Design series of micro-Hi-Fi electronics from Pro-Ject Audio Systems. The Stereo Box S integrated amplifier is aimed at customers who want to listen to high-quality audio, but only require a small, specialised device to amplify it.

Pro-Ject have developed the Box Design range in order to open the world of high-quality hi-fi to those on a small budget or with limited space in their listening room. The new "S Class" Box Design models have a thicker front panel with no screws, adding an elegant and luxurious look to the innovative range. The brand new Stereo Box S is capable of pushing a massive 30W per channel (4 Ohm) out of its diminutive form, making it a worthy piece of kit, even outside of the traditional world of micro-hi-fi.

The Stereo Box S has been designed as a replacement for the popular Stereo Box model. By moving the construction process fully 'in-house', Pro-Ject have been able to develop their own proprietary class D amplifier that will operate happily inside the usual Box Design form factor. The overall construction is a heavy, vibration-free and magnetically isolated aluminium housing that allows the internal components to run coolly and perform to their fullest potential.

The quality construction also runs through to the back of the device where the Stereo Box S is finished with gold-plated input sockets and speaker outputs. A useful 'Record Out' mini-jack socket is also included on the rear, allowing for the device to be partnered with other Box Design accessories, such as the long-standing and ever-popular Head Box headphone pre-amplifier.

Operation is simple, just like it should be. Volume control and input selection is made either via the button and rotary pot on the front of the unit, or with the included slim-line IR remote control.

The Stereo Box S is small, convenient and stylish, but its capabilities make it into a piece of equipment usually associated with a much larger size, and a far less attractive price tag.

The Stereo Box S is available immediately in Black and Silver finishes. **SRP is £199.**

BY PRO-JECT AUDIO SYSTEMS

Micro High End Components

Technical Data: Pro-Ject Stereo Box S

Output Power -	2 x 20W / 30W @ 8 Ohm / 4 Ohm (both channels driven)
Frequency Response -	5Hz - 20kHz (+ 0dB,-0.5dB)
Channel Separation -	> 40dB at 20kHz
Signal to Noise Ratio -	>-100dB (A)
THD -	<0.05% at 10 Watts
Line Level Inputs -	2 pairs Gold-Plated RCA
Input Impedance -	20k Ohms
Record Out -	3.5mm Jack Plug
Power Supply -	Outboard PSU
Max Power Surge -	20V/3A DC
Dimensions (W x H x D) -	103 x 36 x 122 mm
Weight -	720g (without power supply)
