

## Product Announcement

### Roksan TR-5 S2

#### Designed to perform...

*Didcot, Oxfordshire – 11<sup>th</sup> May, 2016*

Roksan Audio's TR-5 speakers were the perfect partner to the multi-award winning K2 electronics range. The development of these popular bookshelves was focused around making a universally capable speaker that provided the perfect match for the K2's sound signature. However, the success and performance of TR-5 has inspired Roksan to produce a new version that builds upon this performance regardless of the pairing electronics.

The TR-5 S2 retains the predecessor's focus on detail and 'openness', but intense listening sessions have turned this new model into something significantly better.

The design innovations focus around a new crossover and an improved internal layout to produce a more controlled, faster sound. The crossover uses improved and modified electrical components and large low-impedance air core voice-coils on a meticulously-designed double-sided PCB. Meanwhile, the cabinet internals have been re-designed and feature a high-absorption internal damping material to eliminate unwanted resonances or standing waves. The end-result is a sound-stage that's wide, deep and articulate while maintaining its musical core.

The TR-5 S2 retains the same drivers from its predecessor. The custom-designed bass driver ensures an extended and accurate bass response from such a compact speaker, while the sound remains tight thanks to its rigid cast chassis. Similarly, the high-tolerance ribbon tweeter provides an open, responsive and clear high-frequency spectrum. In combination with the new crossover, these drive units create a relatively small but attractive speaker that provides room-filling musical enjoyment.

The back-panel is neatly finished with bi-wirable gold-plated speaker sockets, allowing for integration into a number of systems. The TR-5 S2 will be launched to the market in a premium gloss black finish, with alternative options to appear in the future.

The TR-5 S2 loudspeakers do make a perfect partner for Roksan electronics; their price and sound performance make them an ideal choice for the coveted K3 integrated amplifier. However, more so than ever, the TR-5 S2 is a worthy consideration for anyone who takes their musical enjoyment seriously.

**SRP £995.00**

**The TR-5 S2 is available in the UK in Piano Black finish now.**

## Technical Information

Tweeter:	High-tolerance ribbon design
Woofers:	Custom-designed 130mm driver Coated-paper cast chassis with double magnets
Input Sensitivity:	> 88dB (1W, 1m)
Minimum Impedance:	> 6Ω
Nominal Impedance:	8Ω
Frequency Response:	39Hz – 20kHz 55Hz – 20kHz (-6dB)
Nominal Power Handling:	60W
Peak Power Handling:	100W
Dimensions (W x D x H):	190 x 280 x 370mm
Weight:	8.0kg (net) ea.

### About Roksan Audio

Since their formation in 1985 and through to the modern day, *Roksan Audio* has always been associated with high-end hi-fi. The iconic Xerxes turntable was their first product, and since then a full range of quality turntables and electronics has been released from their UK-based headquarters.

Everything Roksan produce is firmly associated with prestige, quality and excellent sound performance. From the iconic Kandy and Caspian ranges, through to the revolutionary Oxygene series, Roksan are at the forefront of good British hi-fi.

### About Henley Designs Ltd.

Everyone has a different interpretation of what good sound is, and at Henley Designs we're no different. We strive to bring customers the best possible selection of hi-fi equipment from a variety of international manufacturers.

Formed in 1997 as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. are one of the UK's premier distributors of quality hi-fi equipment. The brands we distribute are not only highly-regarded in their own right, but they also share a symbiotic relationship with other brands in the portfolio.
