

Product Announcement

TIDAL Comes to Pro-Ject Streamers

A huge high resolution music library comes to your hi-fi system.

Didcot, Oxfordshire – 16th November, 2015

Box Design by Pro-Ject Audio Systems are thrilled to announce that, after many months of development, the company's entire range of Stream Box components are now fully compatible with the TIDAL streaming service.

TIDAL offers an expansive high fidelity music streaming service, and with the latest software update from Pro-Ject, the service's whole music library can be played back in the highest quality through the Stream Box DS net, Stream Box DS+, Stream Box DSA and Stream Box RS.*

Control over your music is managed by the free Box Control application – without any need to switch between different control apps. Now you can browse, manage and playback from a library of 30 million songs through a compact high-quality streaming source!

Full TIDAL integration is included in the latest software releases for all Stream Box models and the Box Control application, and the software updates are completely free to new and existing Pro-Ject customers.*

Pro-Ject's comprehensive range of Stream Box music clients spans a variety of price points and features. All models benefit from the same user interface, and access to the same music playback services, including internet radio, Spotify connect, USB and UPnP playback. The whole range can also be completely controlled by the free proprietary Box Control application. Box Control has been built from the ground-up to work seamlessly with the Stream Box range, and when paired with the Remote Box S or MaiA DS can also offer control over other system devices. For more, visit www.henleydesigns.co.uk.

A complete How-To guide for controlling your TIDAL library with the Box Control application can be downloaded from the Henley Designs website, [here](#).

SRP £0.00*

The necessary software updates for the Stream Box range and the Box Control application on iOS and Android are available to download now.

** TIDAL is a paid for service, so access to this functionality is only available with a paid-for TIDAL account. For more information, visit www.tidal.com. An internet enabled Wi-Fi connection is required for your Smartphone, with the Box Control application ready. Both your Smartphone and the Stream Box have to be on the same network.*

Notes for Editors

About Box Design by Pro-Ject Audio Systems

Box Design by Pro-Ject Audio Systems is an innovative range of micro hi-fi electronics that spans a variety of price points and target markets. Unlike many other compact audio products, the entire Box Design range not only looks great, but it also guarantees to perform like a quality piece of hi-fi.

Based in Vienna, Austria, Pro-Ject Audio Systems use specialised manufacturing partners – primarily in central Europe – to produce all their products. They are recognised around the world not just for the Box Design range, but also for their extensive range of analogue turntables.

About Henley Designs Ltd.

Everyone has a different interpretation of what good sound is, and at Henley Designs we're no different. We strive to bring customers the best possible selection of hi-fi equipment from a variety of international manufacturers.

Formed in 1997 as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. are one of the UK's premier distributors of quality hi-fi equipment. The brands we distribute are not only highly-regarded in their own right, but they also share a symbiotic relationship with other brands in the portfolio.
